

Production Operator

Xeltis BV is looking for a Production Operator to work in a dynamic research environment towards the clinical realization of Xeltis' revolutionary restorative medical devices.

It is a temporary 7-month position in Eindhoven, NL. Contract extensions may be available. It is a full time, 40 hours per week position.

Xeltis is a clinical-stage medical device company pioneering a restorative approach in cardiovascular therapy. Our technology platform, RestoreX™, is the world's first polymer-based technology designed to enable natural restoration of cardiovascular function, through a therapeutic approach called Endogenous Tissue Restoration (ETR).

Who are we looking for?

Education: Technical education preferred

Experience: Relevant industry experience and/or relevant education

Skills:

- Preferably, experience working in an environment having a Quality System
- Strong drive to be precise and thrive for consistency
- Good hand dexterity
- A team-player with good communication skills
- Positive, energetic and enthusiastic
- English language proficiency
- General computer and software proficiency: email, Word, Excel, etc.

Activities include:

- Follow written work instructions to perform various manufacturing tasks in a cleanroom
- Manufacture devices using manual and automated operations
- Perform measurements
- Document manufacturing and testing activities in various formats (reports, forms, etc)
- Collaboration in a team

Working at Xeltis
