

Senior Operations Technician

Xeltis is looking for an experienced Senior Operations Technician to join our team. This position will fill a key role in our dynamic international production team. Our start-up culture is at the core of our company, enabling opportunities and driving continuous growth.

Xeltis is a clinical-stage medical device company with the most advanced polymer-based restorative devices for cardiovascular treatment. Xeltis' devices naturally evolve into living blood vessels or heart valves when colonized by patient's own tissue. We are funded by institutional and private investors and by public entities.

Xeltis' technology is designed to solve unmet clinical needs and to significantly improve patients' lives. The company has a diverse team of over 30 employees from all over the world. Improving patients' lives is what drives us. We strive to work with joy every day.

Your key role as Senior Operations Technician is to deliver technical support to our manufacturing operations. You will be responsible for keeping our crucial equipment running. We are looking for candidates with a minimum of three years of experience in a similar capacity, preferably in the medical device or pharmaceutical industry. You will be the right-hand person of the Production Supervisor Operations.

Roles and responsibilities

- Manage maintenance and calibration of production and laboratory equipment
- Manage installation and documentation of new production and laboratory equipment
- Perform equipment troubleshooting and repair
- Assist with selection of new equipment
- Provide general technical support for daily production and laboratory operations
- Work with production, engineering and quality team to identify, design, test and implement process and test improvements
- Other duties as required

Skills and education

- Technical degree in design, engineering, natural sciences, mechanical repair/maintenance or equivalent experience
- Fluent in English, written and spoken
- Experience in coordinating and documenting equipment maintenance and calibration
- Hands-on experience with equipment maintenance, troubleshooting and repair
- Experience in supporting ongoing manufacturing operations
- Good hand dexterity, attention to detail and technical proficiency
- Familiar with cleanroom operations (preferred)
- Familiar with GMP environment/medical device manufacturing (preferred)
- Familiar with chemical solution preparation and safety practices (preferred)
- Familiar with electrospinning processes (preferred)
- Experience with Quality Control (QC) techniques and documentation (preferred)
- Good communication skills, reliable, independent, goal-oriented, pragmatic attitude
- General computer and software proficiency: email, Word, Excel, etc.
- Ability to work in a fast paced, time sensitive environment

Offer

- Competitive remuneration
- Personal and professional development options
- Full-time role in Eindhoven – NL (part-time can be discussed)
